2077

COVER FEATURE

Cyberpunk 2077

# ING GE

"While it's home to never seen before systems, one of Cyberpunk2077's most impressive has to be JALI. JALI is software capable of complete automation of lip syncing and facial animation that offers developers complete control to fine tune the end result." — PC Gamer Dec 2020

# Speech vs. Singing

## Different roles of vowels and consonants in singing

singing only vowels  
to convey melody

layering consonant for  
lyrical coherence and rhythm

# VOCAL Insight: melodic accent + pitch sensitivity

percussive, speech-like consonants  
(note enunciated "t"s)

softly consonants, blended vowels  
(note soft, silent "t"s)

video credit:

[https://youtu.be/A\\_MjCqQoLLA](https://youtu.be/A_MjCqQoLLA)

<https://youtu.be/YIBlau59Piw>

# VOCAL Insight: melodic accent + pitch sensitivity

## Pitch Sensitivity (Vowels)

lip is held **statically**  
despite strong vibrato

lip moves **dynamically**  
during vibrato

video credit:

[https://youtu.be/ZATunybjm\\_4](https://youtu.be/ZATunybjm_4)

# Eye-mojis: Windows to the Soul

[S3: Speech, Script and Scene driven Head and Eye Animation, Pan, Agrawal, Singh, *SIGGRAPH 2024*]

# S<sup>3</sup>: conversational gaze

# S<sup>3</sup> Insight: classify conversational gaze

Predict conversational gaze focus/aversion timing from speech

Predict gaze trajectories from script + scene context

Isolate and Predict rhythmic head motion from speech

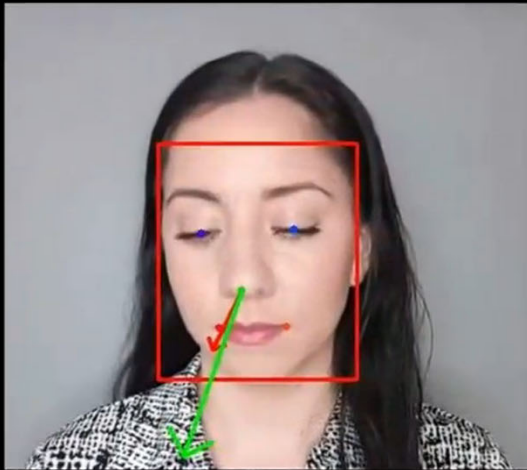

# audition dataset

we collected 111 actor audition videos totalling  
379 minutes of uncut audiovisual data

# dataset annotation - head

raw head motion is obtained using  
mediapipe [Lugaresi et al . 2019]
